Subject: Questions for Mayor Kirkland and Council

K. Richardson
2106 w. 6th st, Chester Pa

Mayor Kirkland i was at the 4/24 march. I heard several people ask you to speak to the people why didn't you address us? Instead you sat in the car right across the street from where we were. Were you there in support of the march for clean air or opposed to it? Or was that an intimidation move?

Mr. Horace Strand directs the Chester Environmental Partnership, which is listed on Covanta's website as a trusted source of information. Mr. Strand is also the head of the Chester Stormwater Authority, having been appointed by the Kirkland administration. Is Mr. Strand or the Authority receiving any consideration for CEP's endorsement of Covanta in Chester?

Subject: Covanta Facility

Good morning ,

I am a long time resident here in the City of Chester I am responding to the minutes that I read regarding this facility. I have a few questions ; 1. Why do I have to smell trash from trucks traveling down 291

2. Trucks travel at unsafe speeds up and down 291. Why do we have to endure the unsafe conditions where children play

3. The dirt that comes from the trucks is horrible and we are cleaning inside our homes daily from the dust and outside our homes . It's discouraging. Why do we have to live under these conditions?

4. My home has structural damage from the trucks traveling behind my house? What is the city going to do about the damage in my and others homes from Covanta trucks.

5. Your inspectors for this facility I'm sure work during the day. The violations occur to our air quality at night or early morning when no one can hear or see but us.. did you know that this is happening?

6. Who is responsible for getting an abandoned vehicles off our street. There are at least 3 abandoned cars without license plates on our street right now? We have a parking problem.

7. Who is responsible for neighbors not cutting their grass, or keeping their house maintained? We have a problem in our neighborhood. Who is monitoring these issues?

8. Why are we entertaining bringing more trash to our city when we are not able to maintain our city streets and neighborhood now with what's coming into the facility presently ?

I am not against industry for growth , but this industry is not a good neighbor. COVANTA must be stopped in this community! Thank you!!
