

Department of Licenses & Inspections

ELECTRICAL INSPECTIONS:

Review the following information to understand what work needs to be completed before requesting inspections

ROUGH INSPECTION- All wire must be pulled, stapled properly, and all splices made and ready to accept devices and fixtures. Do not install any devices or fixtures or cover any wiring with insulation or wall covering, such drywall or paneling, prior to the rough-in inspection.

FINAL INSPECTIONS- The electrical installation must be complete when you request the final inspection. All devices and fixtures must be installed and service equipment complete and labeled properly. All wiring must be free from short circuits, ground fault and open circuits. All light fixtures and light switches must be grounded. All kitchen cabinets & countertops must be installed
